Note for Mac users

Some keystrokes and menu items are different on a Mac from those used in Windows and Linux. The table below gives some common substitutions for the instructions in this chapter. For a more detailed list, see the application Help.

Windows or Linux	Mac equivalent	Effect
Tools > Options menu selection	LibreOffice > Preferences	Access setup options
<i>Right-click</i>	<i>Control+click</i>	Opens a context menu
<i>Ctrl (Control)</i>	<i>⌘ (Command)</i>	Used with other keys
<i>F5</i>	<i>Shift+⌘+F5</i>	Opens the Navigator
<i>F11</i>	<i>⌘+T</i>	Opens the Styles and Formatting window

Introduction

This chapter covers methods for editing shared documents: sharing (collaboration), recording changes, adding comments, reviewing changes, merging and comparing documents, and saving and using document versions. Basic editing techniques are discussed in Chapter 2, Entering, Editing, and Formatting Data.

Sharing documents (collaboration)

In LibreOffice Writer, Impress, and Draw, only one user at a time can open any document for editing. In Calc, many users can open the same spreadsheet for writing at the same time.

Each user who wants to collaborate should be sure to enter a name on the **Tools > Options > LibreOffice > User Data** page.

Some menu commands are not available (grayed out) when change tracking or document sharing is activated.

Setting up a spreadsheet for sharing

At any time, you can set up a spreadsheet for sharing with others. With the spreadsheet document open, choose **Tools > Share Document** to activate the collaboration features for this document. A dialog opens where you can enable or disable sharing.

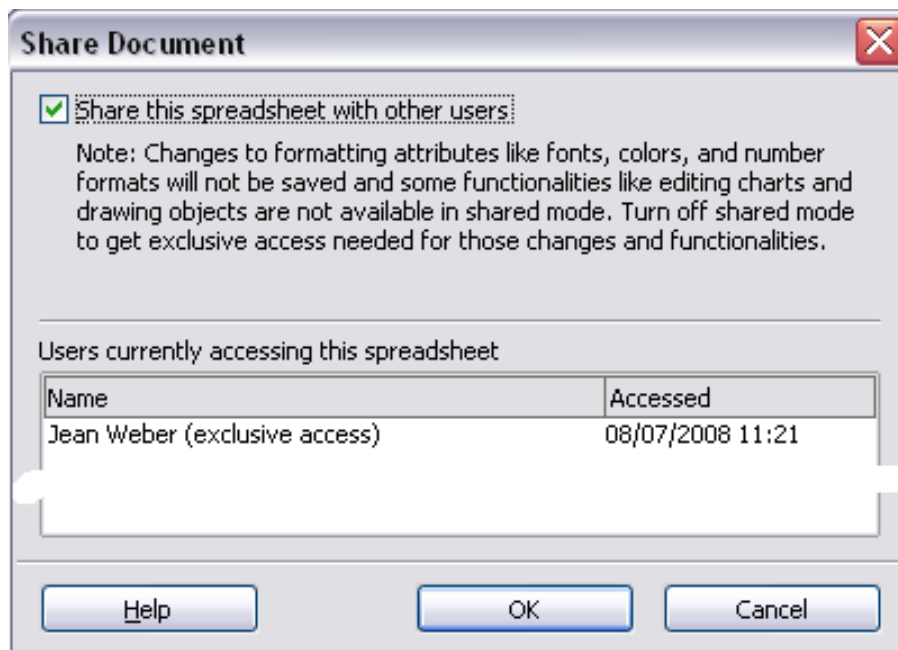

Figure 1: Choosing to share a spreadsheet

To enable sharing, check the box at the top of the dialog, and then click **OK**. If the spreadsheet has been saved previously, a message appears stating that you must save it to activate shared mode; click **Yes** to continue. If the spreadsheet has not been saved previously, the Save dialog appears. After saving, the word (**shared**) is shown on the title bar after the document's title.

The **Tools > Share Document** command can be used to switch the mode for a document from unshared to shared. However, if you want to use a shared document in unshared mode, you need to save the shared document using another name or path. This creates a copy of the spreadsheet that is not shared.

Opening a shared spreadsheet

When you open a spreadsheet document that is in shared mode, a message appears stating that the document is in shared mode and that some features are not available in this mode. After clicking **OK**, the document is opened in shared mode. You can select the option to not show the warning again.

The following features are disabled in a shared spreadsheet document:

Edit > Changes, except for **Merge Document**
Edit > Compare Document
Edit > Sheet > Move/Copy & Delete
Insert > Cells > Shift Cells Down & Shift Cells Right
Insert > Sheet from file
Insert > Names
Insert > Comment
Insert > Picture > From File
Insert > Movie and Sound
Insert > Object
Insert > Chart
Insert > Floating Frame
Format > Sheet > Rename, Tab Color
Format > Merge Cells > Merge and Center, Merge Cells, Split Cells
Format > Print Ranges
Tools > Protect Document
Data > Define Range
Data > Sort
Data > Subtotals
Data > Validity
Data > Multiple Operations
Data > Consolidate
Data > Group and Outline (all)
Data > Pivot Table

Saving a shared spreadsheet

When you save a shared spreadsheet, one of several situations may occur:

- If the document was not modified and saved by another user since you opened it, the document is saved.
- If the document was modified and saved by another user since you opened it, one of the following events will occur:
 - If the changes do not conflict, the document is saved, the message below appears, and any cells modified by the other user are shown with a red border.

Figure 2: Update message after saving

- If the changes conflict, the Resolve Conflicts dialog is shown. You must decide for each conflict which version to keep, yours or the other person's. When all conflicts are resolved, the document is saved. While you are resolving the conflicts, no other user can save the shared document.

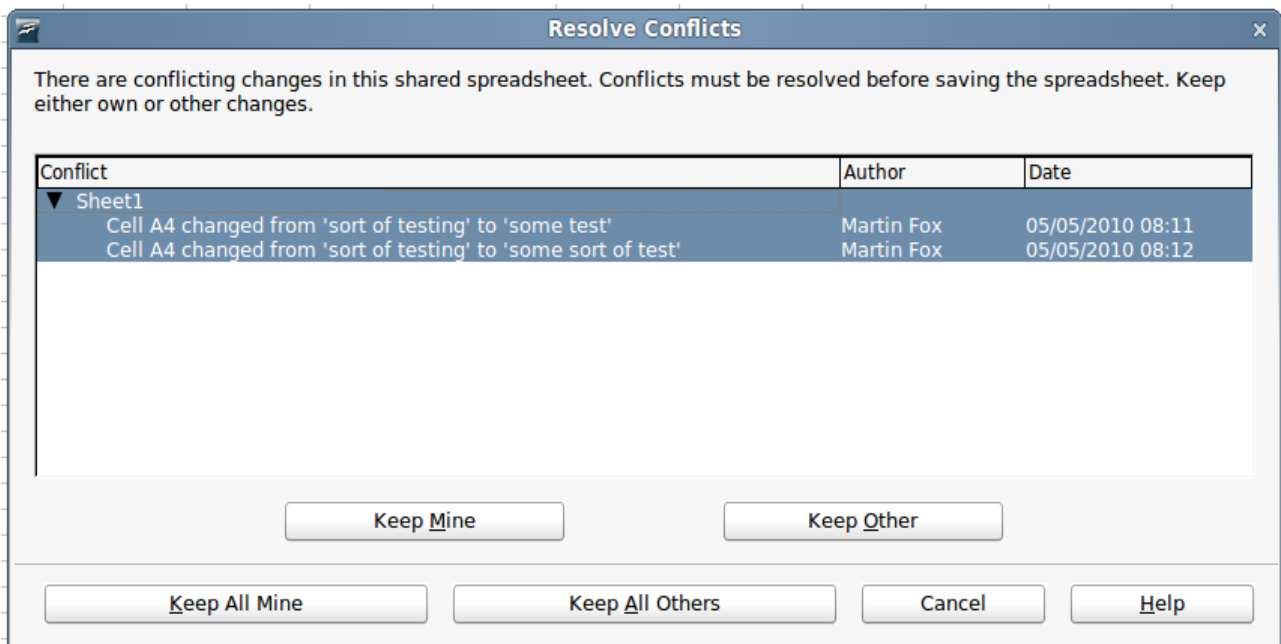

Figure 3: Resolve Conflicts dialog

- If another user is trying to save the shared document and resolve conflicts, you see a message that the shared spreadsheet file is locked due to a merge-in in progress. You can choose to cancel the Save command for now, or retry saving later.

When you successfully save a shared spreadsheet, the document shows the latest version of all changes saved by all users.

Recording changes

You can use several methods to record changes that you or others make to a document:

- You can use change marks to show added material, deleted material, and changes to formatting. Later, you or another person can review the document and accept or reject each change. Not available in shared files.
- If you are not using file sharing, you can make changes to a copy of the document (stored in a different folder, under a different name, or both), then use Calc to compare the files and show the changes. See page 13.
- You can save versions that are stored as part of the original file. See page 14.

Reviewers can leave comments in the document, either attached to specific changes or standalone.

Preparing a document for review (optional)

This feature is not available in shared documents. When you send a document to someone else to review or edit, you may want to set it up so that the editor or reviewer does not have to remember to turn on the revision marks.

After you have turned on revision marks, you can optionally password protect the document so that any user must enter the correct password in order to turn off protection and accept or reject changes. It is not necessary to password protect the document while preparing it for review.

- 1) Open the document and make sure that the **Edit > Changes > Record** menu item has a check mark next to it, indicating that change recording is active. You can also use **File > Properties > Security** and select **Record changes**.

- (Optional) Click **Edit > Changes > Protect Records**. On the Enter Password dialog, type a password (twice) and click **OK**. You can also use **File > Properties > Security** and click the **Protect** button to open the Enter Password dialog.

Identifying copies of spreadsheets

When not using the document sharing feature, it is important to keep track of the different copies of the document. This can be done either in the file name or in the file title. If you have not provided a file title in the spreadsheet's properties, the spreadsheet's file name is displayed in the title bar. To set the title of the spreadsheet, select **File > Properties > Description**.

Recording changes (tutorial)

For this chapter we will work with a budget proposal for a baseball team.

You are the sponsor of a youth baseball team. The coach has submitted a budget to you for the season and you need to edit the costs and return it to her.

You are concerned that if you just make the changes, then the coach will not see the changes you made. You decide to use Calc with the record changes feature turned on, so that the coach can easily see the change you have made.

Figure 4 shows the budget spreadsheet your coach submitted.

	A	B	C	D	E
1			Baseball Budget Proposal		
2	Item Description	Quantity	Cost	Total	Comments
3	Uniforms	25	\$50.00	\$1,250.00	Need to update the team look
4	Baseballs	250	\$4.00	\$1,000.00	We need to 10 per game
5	Umpire fees	25	\$50.00	\$1,250.00	1 Umpire per game
6	Bats	5	\$35.00	\$175.00	We need bats of various sizes
7	Snacks	25	\$15.00	\$375.00	This is the max cost per game for after game snacks
8	Batting helmets	5	\$40.00	\$200.00	We need a minimum of 5
9	Catching Gear	1	\$300.00	\$300.00	Need to protect the catcher, old gear ugly
10	Spare Gloves	4	\$45.00	\$180.00	Just in case someone forgets their glove
11				\$4,730.00	Total
12					

Figure 4: Baseball budget spreadsheet

Looking over the figures, you see a few places where money could be saved:

- Post-game snacks can be bought by parents.
- New uniforms can wait; only buy 10 to replace damaged ones.
- Buy cheaper baseballs.
- Only buy 2 spare gloves.

To make these changes, use the record changes feature in Calc. To start recording changes:

- 1) Open the Budget Spreadsheet.
- 2) Select **Edit > Changes > Record** from the menu bar.
- 3) Begin editing the document.

A colored border, with a dot in the upper left-hand corner, appears around a cell where changes were made (Figure 5). Other reviewers then quickly know which cells were edited. A deleted column or row is marked by a heavy colored bar.

	A	B	C	D	E
1			Baseball Budget Proposal		
2	Item Description	Quantity	Cost	Total	Comments
3	Uniforms	10	\$50.00	\$500.00	Need to update the team look
4	Baseballs	250	\$2.00	\$500.00	We need to 10 per game
5	Umpire fees	25	\$50.00	\$1,250.00	1 Umpire per game
6	Bats	5	\$35.00	\$175.00	We need bats of various sizes
7	Snacks	0	\$15.00	\$0.00	This is the max cost per game for after game snacks
8	Batting helmets	5	\$40.00	\$200.00	We need a minimum of 5
9	Catching Gear	1	\$300.00	\$300.00	Need to protect the catcher, old gear ugly
10	Spare Gloves	2	\$45.00	\$90.00	Just in case someone forgets their glove
11				\$3,015.00	Total
12					

Figure 5: Edited document with red border on changed cells

Note

Some changes, for example cell formatting, are not recorded and marked.

Tip

To change the color that indicates changes, select **Tools > Options > LibreOffice Calc > Changes**.

When you finish editing the document, you can send it to your coach.

You may want to explain your rationale for the changes. You can share your insight in two ways: by adding comments to the changes you made, or by adding general comments to the spreadsheet.

Adding comments to changes

Calc automatically adds to any recorded change a comment that describes what was changed (for example, *Cell B4 changed from '9' to '4'*). Reviewers and authors can add their own comments to explain their reasons for the changes.

To add a comment to a change:

- 1) Make the change to the spreadsheet.
- 2) Select the cell with the change.
- 3) Choose **Edit > Changes > Comments**. The dialog shown in Figure 6 appears.

Figure 6: Insert Comment dialog

- 4) Type your comment and click **OK**. The automatically-added comment provided by Calc cannot be edited.

After you have added a comment to a changed cell, you can see it by hovering the mouse pointer over the cell, as shown in Figure 7.

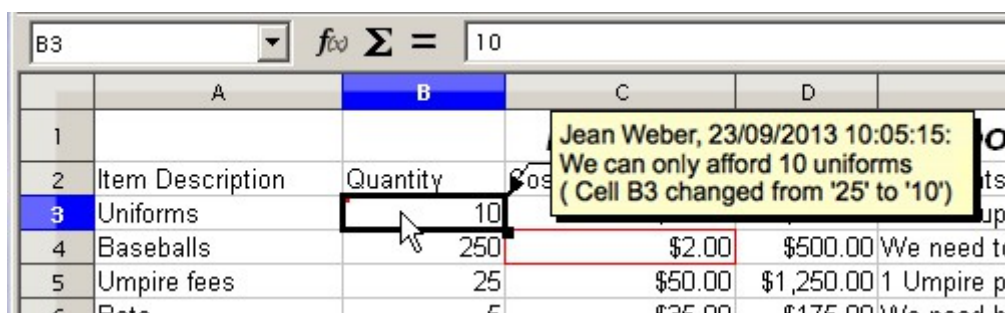

Figure 7: Comment added to cell B3

The comment also appears in the dialog when you are accepting and rejecting changes, as shown in the first line of Figure 12 on page 12.

Editing change comments

- 1) Select the cell with the change comment that you want to edit.
- 2) Select **Edit > Changes > Comments**.
- 3) Edit the comment and click **OK**.

Adding other comments

Calc provides another type of comments (formerly called “notes”), which authors and reviewers often use to exchange ideas, ask for suggestions, or brainstorm in the document.

To add a comment:

- 1) Select the cell that the comment applies to.
- 2) Select **Insert > Comment** or right-click and select **Insert Comment**. (The latter method does not work if the automatic spelling checker is active and the cell contains a misspelled word.) The box shown in Figure 8 appears.

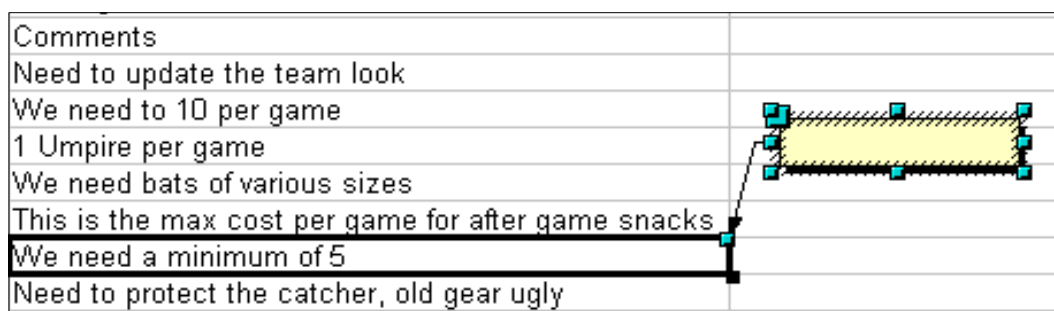

Figure 8: Inserting a comment

- 3) Type the text of your comment in the box, then click outside the box to close it.

Now the cell to which you added the comment has a colored dot in the upper right-hand corner, as shown in Figure 9. It does not have a colored border, unless the cell was also changed.

Figure 9: Colored dot in cell containing a comment

Tip

You can change the colors Calc uses for notes by selecting **Tools > Options > LibreOffice > Appearance**.

To view the comment you just added, hover the mouse pointer over the cell that has a comment; the comment appears, as shown below.

Figure 10: Viewing a comment

Editing comments

You can edit and format the text of a comment, just as you do for any other text.

- 1) Right-click on the cell containing the comment marker and choose **Show comment** from the context menu.
- 2) Select the comment, then double-click on it. The cursor changes to the usual blinking text-entry cursor, and the Formatting toolbar changes to show text attributes.
- 3) When done, click outside the comment to deselect it. To hide the comment again, right-click on the cell and deselect **Show Comment** on the context menu.

Formatting comments

You can change the background color, border style, transparency, and other attributes of a comment.

- 1) Right-click on the cell containing the comment marker, and choose **Show comment** from the context menu.
- 2) Click on the comment itself. The Formatting toolbar changes to show many of the comment formatting options. These are the same as the options for formatting graphics; see Chapter 5, Using Graphics in Calc, for more information.

You can also right-click on the comment to see a menu of choices, some of which lead to dialogs in which you can fine-tune the formatting; these dialogs are also discussed in Chapter 5.

- 3) When done, click outside the comment to deselect it. To hide the comment again, right-click on the cell and deselect **Show Comment** on the context menu.

Finding comments using the Navigator

The small comment markers in the corners of cells can be difficult to see, so Calc provides another way to find them, by using the Navigator. If any comments are in the spreadsheet, the Navigator shows a mark (usually a + or an arrow) next to the word Comments. Click on this mark to display a

list of comments. Double-click on the comment you want to jump directly to the cell it is associated with.

Reviewing changes

At this point, we are going to change our perspective from the point of view of the team sponsor to that of the coach, so we can see how to review and accept or reject the changes to the document the coach originally wrote.

You are the coach of a youth baseball team and you submitted a potential budget created in Calc to your team sponsor.

Your sponsor has reviewed the document using the record changes feature of Calc. Now, you want to review those changes and accept or reject the counter proposal.

Because the sponsor recorded changes in Calc, you can easily see what changes were made and decide how to act.

Viewing changes

You have some control over what changes you see when reviewing a document. Select **Edit > Changes > Show** from the Menu bar. The Show Changes dialog (Figure 11) opens.

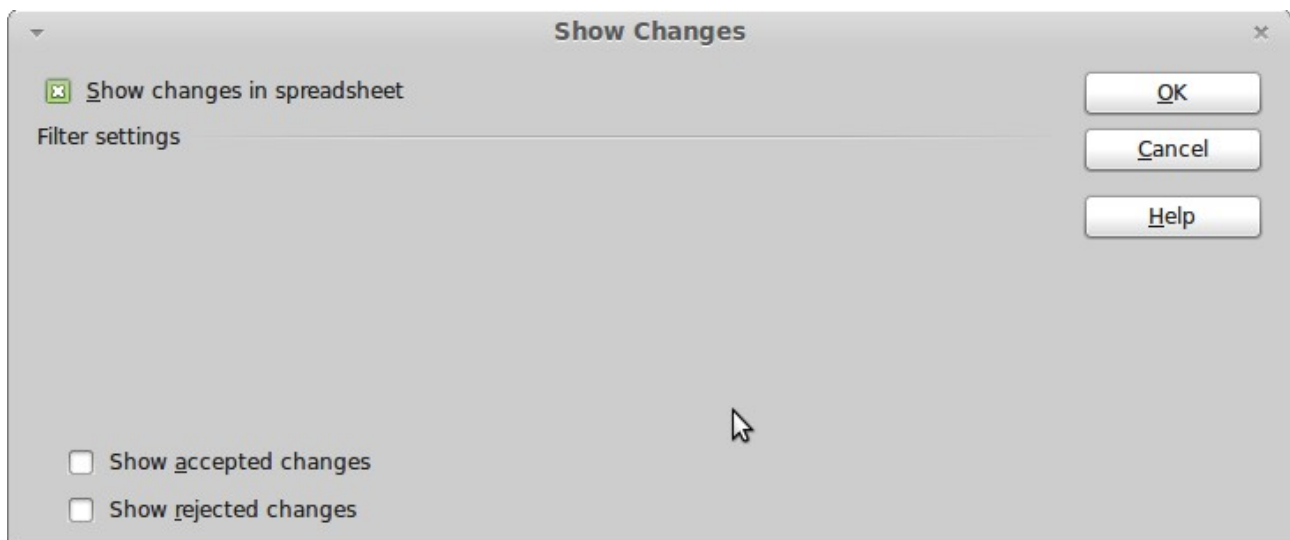

Figure 11: Show changes dialog

Accepting or rejecting changes

When you receive a document back with changes, the beauty of the recording changes system becomes evident. Now, as the original author, you can step through each change and decide how to proceed. To begin this process:

- 1) Open the edited document.
- 2) Select **Edit > Changes > Accept or Reject**. The dialog shown in Figure 12 appears.
- 3) You can step through the changes one at a time, choosing to accept or reject each change as you go through. You can also accept or reject all changes at one time.

Figure 12: Accept or Reject changes dialog

The *Comment* column by default contains an explanation of the change that was made. If the reviewer added a comment to the change, it is displayed, followed by the description of the change, as in the first line of Figure 12.

If a change has been superceded by later change (by either the same person or another person), the changes are hierarchically arranged with a plus sign for opening up the hierarchy.

Below the list of changes to be accepted or rejected are shown any changes that have previously been dealt with.

On the Filter tab of this dialog (Figure 13), you can choose how to filter the list of changes: by date, author, cell range, or comments containing specific terms. After selecting the filter criteria, switch back to the List tab to see the results.

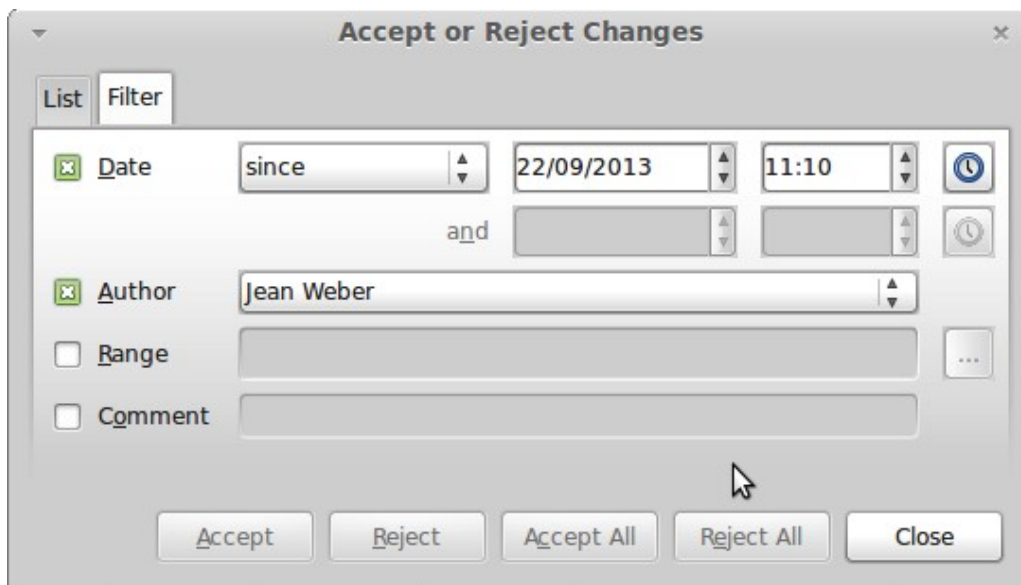

Figure 13: Filters set here affect the list of changes shown on the List tab

Merging documents

You submitted your budget proposal to your sponsor, but you sent it to one of your assistant coaches as well. Both of them returned their revised budget to you at the same time.

You could review each document and the changes separately, but to save time, you want to see both of their revisions simultaneously.

To do this, you can use Calc's merge document feature.

The processes discussed to this point are effective when you have one reviewer at a time. Sometimes, however, multiple reviewers all return edited versions of a document at the same time. In this case, it may be quicker to review all of these changes at once, rather than one review at a time. For this purpose, you can merge documents in Calc.

To merge documents, all of the edited documents need to have recorded changes in them.

- 1) Open the original document.
- 2) Select **Edit > Changes > Merge Document**.
- 3) A file selection dialog opens. Select a file you want to merge and click **OK**.
- 4) After the documents merge, the Accept or Reject Changes dialog opens, showing changes by more than one reviewer. If you want to merge more documents, close the dialog and then repeat steps 2 and 3.

Now all of the changes are combined into one document and you can accept or reject the changes. Changes from different authors appear in cells outlined in different colors, as shown in Figure 14. In this example, all of the changes from Robert are outlined in blue and the changes from Mia are outlined in red.

Baseball Budget Proposal				
Item Description	Quantity	Cost	Total	Comments
Uniforms	10	\$50.00	\$500.00	Need to update the team look
Baseballs	275	\$2.00	\$550.00	We need to 10 per game
Umpire fees	25	\$50.00	\$1,250.00	1 Umpire per game
Bats	5	\$35.00	\$175.00	We need bats of various sizes
Snacks	0	\$15.00	\$0.00	This is the max cost per game for after game snacks
Batting helmets	5	\$40.00	\$200.00	We need a minimum of 5
Catching Gear	1	\$175.00	\$175.00	Need to protect the catcher, old gear ugly
Spare Gloves	2	\$45.00	\$90.00	Just in case someone forgets their glove
			\$2,940.00	Total

Figure 14: Merged documents with different author colors

Comparing documents

Sometimes when sharing documents, reviewers may forget to record the changes they make. This is not a problem with Calc, because Calc can find the changes by comparing documents.

In order to compare documents you need to have the original document and the one that is edited. To compare them:

- 1) Open the edited document that you want to compare with the original document.
- 2) Select **Edit > Compare Document**.

3) An open document dialog appears. Select the original document and click **Insert**.

Calc finds and marks the changes as follows:

- All data that occurs in the edited document but not in the original is identified as inserted.
- All data that is in your original document but is not in the edited document is identified as deleted.
- All data that is changed, is marked as changed.

From this point you can go through and accept or reject changes as you could normally.

Saving versions

Most documents go through many drafts. It is often useful to save new versions of a document. You can do this by saving a copy of the document (under a different name) after each revision, or by using Calc's version feature.

Caution

If you do a **Save As...** of a document with different versions stored in it, the old versions are not saved in the new file.

To use version management in Calc:

1) Choose **File > Versions**. The Versions dialog opens.

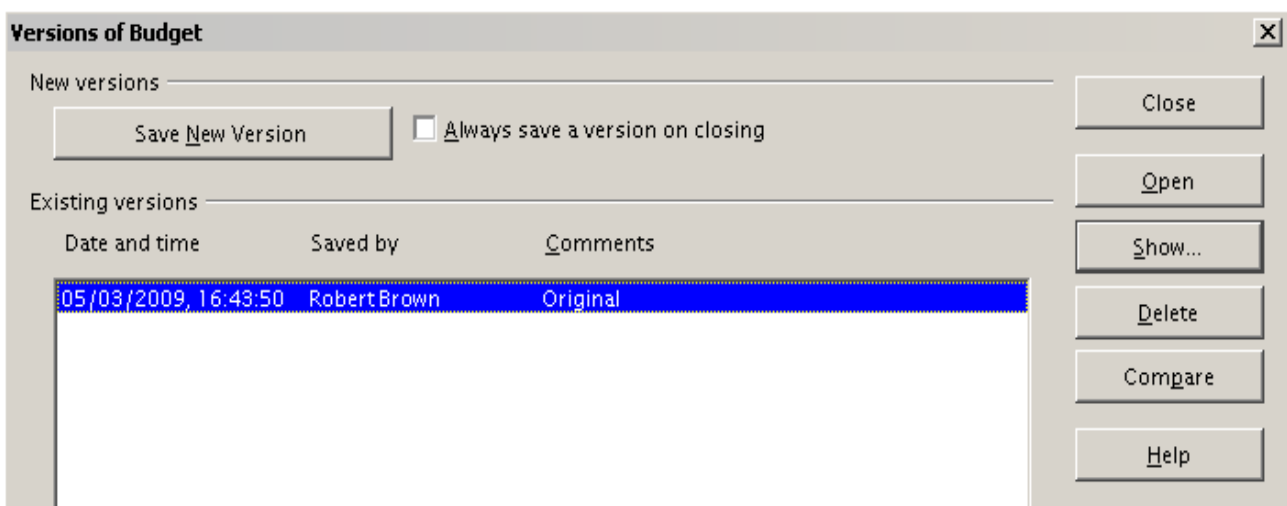

Figure 15: Version management dialog

- 2) Click the **Save New Version** button to save a new version.
- 3) A dialog opens where you can enter comments about this version.

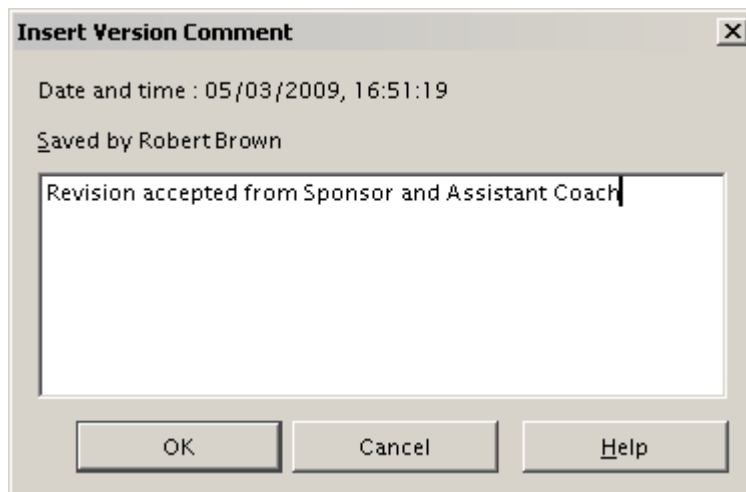

Figure 16: Version comment dialog

4) After you enter your comment and click **OK**, the new version is included in the version list.

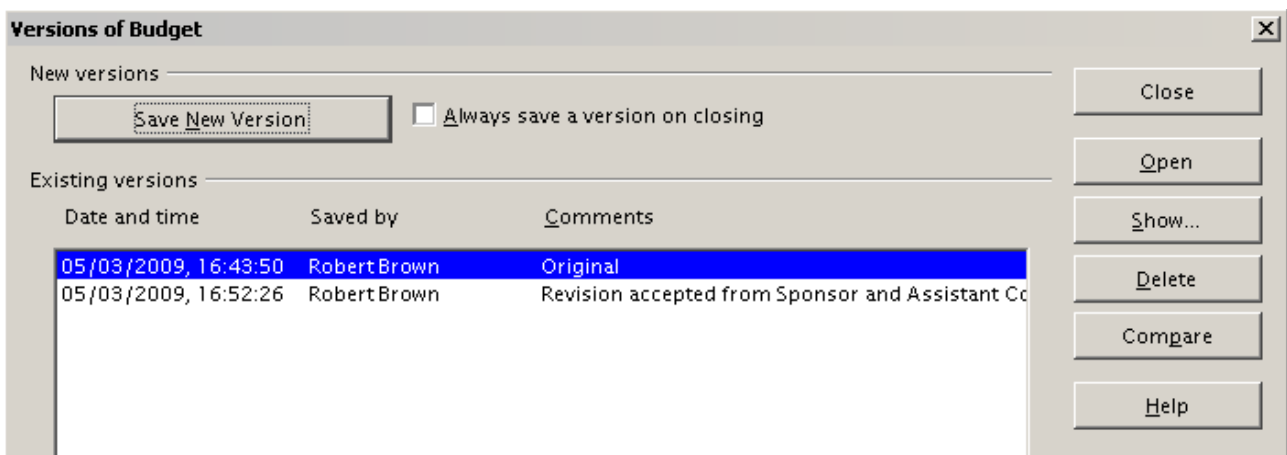

Figure 17: Updated version list

Now when you save the file, both versions are saved in the same file. From this point you can:

- Open an old version – Select the version and click the **Open** button and a read-only copy of a previous version opens.
- Compare all versions – Clicking the **Compare** button performs an action similar to merging documents together. An Accept or Reject Changes dialog opens showing all of the changes through the different versions.
- Review the comments – Select a version and click the **Show** button to display the full comments made by yourself or other reviewers.

Note

The new file is larger, as if two spreadsheets were saved together.
